Summary

Second-year Computer Science engineering student with strong fundamentals in programming, object-oriented design, and problem-solving. Proficient in C++ and Python with hands-on experience in building full-stack web applications using the MERN stack. Interested in software engineering, data structures, and scalable systems. Actively preparing for Google STEP.

Technical Skills

- **Programming Languages:** C++, Python
- **Core Concepts:** Object-Oriented Programming (OOP), Data Structures, Algorithms, REST APIs
- **Web Development:** MongoDB, Express.js, React, Node.js
- **Tools & Platforms:** Git, GitHub, VS Code

Projects

- **AI Code Reviewer:** Developed an AI-assisted code review application using Node.js and Express.js. Applied object-oriented principles to design modular components. The system analyzes source code and provides feedback on code quality, common errors, and basic security practices.
- **GitHub Profile Viewer:** Built a React-based web application that fetches and displays GitHub user profiles using REST APIs. Implemented reusable components and managed application state using React hooks.

Education

- **Bachelor of Engineering in Computer Science and Engineering**
Don Bosco Institute of Technology, Bangalore
2024 – 2028 (Expected) — CGPA: 8.75

Certifications & Activities

- Yugaantar 2025 — DevForge Technical Event (Scaler)
- Mediverse — 24-hour Technical Hackathon (IEEE-STB, BMSIT&M)
- IIT Bombay Spoken Tutorial — JavaScript
- Infosys Certification — Spring Boot
- Infosys Certification — Microsoft Excel and Data Analytics

Hobbies & Interests

- Solving algorithmic and logical problems on competitive programming platforms
- Playing chess, focusing on strategy, pattern recognition, and long-term planning
- Exploring computer science concepts through side projects and technical blogs
